NEW YORK:

JOHN POLHEMUS, Printer, 102 Nassau St.

1879.

PREFACE.

In this Catalogue collectors will find many very fine pieces of the American series, and from the fact of there being duplicates of most, they will, undoubtedly, go cheap, thus offering a splendid opportunity to collectors to obtain choice pieces at a low rate, and for dealers to replenish their stocks at lowest figures, it being very doubtful if such a stock of cents will be offered again.

In regard to the condition of the various pieces, we can assure intending purchasers at a distance that they have all been faithfully described, and in cases of the slightest doubt, the condition of the coins has, if anything, been rather under-estimated.

To the large number of new collectors to whom this Catalogue will be sent, and who have not yet commenced to purchase their coins at auction, we would say in regard to the selling, each lot will be knocked down to the highest bidder ; the lots are sold so much for each coin in it, so if you desire a lot of coins which contains ten, and you wish to pay $1.00 for it, your bid should be 10 cents, which would be $1.00 for the lot. Amateurs sending their bids in from a distance, should be very particular in regard to this. The Auctioneers, Messrs. Scott, and other dealers, will attend to the purchasing of any desired lots for parties unable to attend the sale, at a charge of 10 per cent. Always state your highest price, and rely on the honor of those you employ to make the purchases for you at as low a figure as possible.

THE

COINAGES OF THE WORLD,

ANCIENT AND MODERN.

This work is intended to give correct information on a subject of which no educated person can afford to be ignorant; and yet, till the publication of this volume, it has been impossible to obtain a general knowledge of the *Coinages of the World* without reading through dozens of heavy quartos, at great loss of time, and probably heavy expense.

By the aid of this book, any person can at once determine the nationality of any coin they may possess, and obtain much interesting information concerning the cause which led to its issue. It is well filled with beautifully executed representative coins of every people, age and country, and is the only comprehensive book on the subject ever published. The paper, press-work and binding are all of the very best. No library can be complete without it.

PRICE—CLOTH, $2.50. HALF MOROCCO, $3.50.

For sale by all booksellers, or will be sent, post free, on receipt of price, by the publishers,

CRITIQUES.

The New York Times of December 27th, says:

"What every student of Coinages—not the mere collector of old coins—wants to know."

The New York World of November 27th, says:

"Welcome to all amateur and experienced numismatologists, to whom it will not only convey valuable information, but be useful as a work of reference."

The New York Evening Post of November 29th, says:

"A work of great interest to numismatists and collectors of coins. * * * The text, which is full, is illustrated by several hundred engravings of the principal coins of all ages and countries."

The New York Daily Graphic of December 23d, says:

"Shows a great deal of special study and painstaking research. It is a monograph full of interesting and curious information, and besides its ample learning, gives several hundred engravings of the principal coins. The various appendices to the volume add materially to its convenience and value for reference."

The American Journal of Numismatics of January 1st, says:

"This is an octavo volume of 306 pages, with a large number of wood-cuts of examples of both ancient and modern coins. It has several appendices, giving lists of the French sovereigns, explanations of the abbreviations on Roman coins, a list of Roman families who have issued coins, and other matters of interest. The text is sufficiently elaborate to give the general reader a good idea of the subject, and to excite his interest in the science of numismatics. From the brief examination we have been able to give it, we judge it to be one of the most valuable and compendious books on coins, especially for those collectors who have not the time or inclination to consult the ponderous quartos of the old writers, which has yet appeared."

The Coin Collector's Journal of January 1st, says:

"This is decidedly the most important work on numismatics that has appeared during the past year, and will doubtless be the means of starting many new collections, as it is written in popular style, and occupies a field distinctly its own. The first chapter introduces us to the first coin, and we are gradually led from the coins of the Greek Island of Ægina, to those of Athens, Corinth and Macedonia; from Miletus and Ephesus to Egypt and Judea; from Græcia Magna to Rome, and so down through the Byzantine Empire to Mediæval and modern Europe, including also Asia, Africa and America (the coins of our country and England being very fully described), giving fine engravings of all the principal types of each, till every coin-issuing State or Colony has been noticed; in fact, it is more than a coin book, it is a short history of the world, and should be in every house."

THE COATS OF ARMS OF THE WORLD.

(*RUSSIA.*)
Uncolored *fac simile* showing size.

This magnificent chart contains accurate representations of the armorial bearings of the nations of the world, all of which are beautifully and correctly emblazoned in gold and silver, and their true colors.

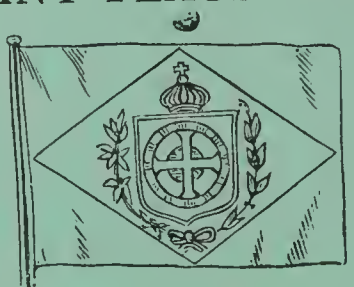
As a sheet for framing, it is an acquisition to any drawing room, and is indispensable in the library or study.

As a guide to determine the nationality of foreign coins or postage stamps, (most of which bear the issuing countries' arms), it will be found of great service. While cut up and inserted in stamp albums, they will be found to add much to the appearance of the page.

Printed on fine heavy paper for framing, or on the same quality of thin paper for inserting in albums. Price, 50c

THE MERCHANT FLAGS OF THE WORLD.

AUSTRIAN-ITALY.



BRAZIL.

FINLAND.

Uncolored fac-similes, showing size and style.

"These brilliant colored Flags faithfully represent the emblems of the different nations of the earth, and as such are a great acquisition to any Album, while the exceedingly low price (25 cents) at which they are published, places them within the reach of all."

"This Chart containing many Flags never before published, has been collected with great care, and can be relied upon as being strictly accurate, and by its aid the nationality of any ship may be easily determined, as it gives the Flag of the NATION instead of the gorgeous piece of bunting which simply belongs to one family, and is seldom, if ever, seen out of their country."

"These sheets possess three great advantages (to the Collector) over any other we are acquainted with, which consist in the facts that there is only one Flag to each country: more nations represented than have heretofore been given, and only Flags of those countries which issue postage stamps. These we consider of great importance to those who buy them to put in albums, as they can use them all instead of having to throw away half the purchase The colors are very brilliant, and withal correct, and being printed on very thin paper, the book is not swelled to an inordinate thickness."

Beautifully and correctly printed in FIVE colors on fine heavy paper for framing, or thin paper for albums. Price only 25 cents.

In ordering please state which paper is required.
